Competition Sectors

The final detail for the competition sectors has yet to be determined. There is a broad range of lake and river options available in the Snowy Mountains Region of Australia. This Region has been in extensive drought over the past 10 years however recent good and prolonged rains are likely to impact on the final choice of venue. Despite the drought fishing opportunity abounds.

All potential venues have been used in state and national competitions and are 'tried and true' in terms of the equality and quality of fishing opportunity.
